

Potmix® Anti-adhesive is an asphalt release agent used on metallic surfaces of machinery and equipment that come in contact with bituminous material. The product is made of unique natural fat derivatives and surfactants, and is fully biodegradable. It does not remove the bitumen as diesel and RMEs do and it contains no VOCs. Unlike other products the Anti-adhesive has no flash point making it the safest option in hot working areas. The liquid is coloured light blue to ensure a visibly even coverage.

Test 1: Hot asphalt on diesel, RME and Anti-adhesive. The result two hours later.

Test 2: Solubility of diesel, RME and Anti-adhesive after four hours.

Article no.	Product name	Unit	pcs / pallet
24405	Anti-adhesive 5 l	canister	54 (½ pallet)
24425	Anti-adhesive 25 l	canister	12 (½ pallet)
24460	Anti-adhesive 200 l	barrel	1 (½ pallet)
24470	Anti-adhesive 1000 l	IBC	1
